Dear <<First Name>> <<Last Name>>,

I have the pleasure to invite you to Cosmo Tech's latest webinar:

**[How to Test and Improve Planning for Your Shutdowns and Turnarounds:
The Benefits of Complex Simulation](#)**

In this webinar, you'll learn about the benefits of complex simulation for shutdown and turnaround planning optimization. You'll hear about our game-changing planning optimization software solution, and we'll explain the incredible value that can be unlocked by planning with a holistic tool like Cosmo Tech's.

Joining the Cosmo Tech team will be **Frédéric Turkisch**, Director at **CGI Business Consulting** and an expert in energy infrastructure and commodities. Together Cosmo Tech and CGI have created this unique planning optimization software solution for complex industrial systems, one that is already finding favor in some of Europe's most significant critical infrastructure projects.

From this webinar you will gain new knowledge of:

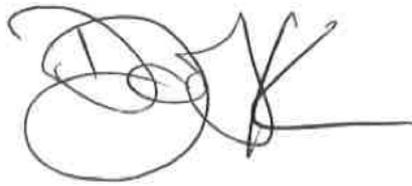

- the challenges of planning a large shutdown or turnaround

- the limits of traditional approaches to planning complex shutdowns and turnarounds
- how predictive simulation can help decision makers test and improve their plans
- how to extract maximum value from a complex system

The webinar will take place between **3:00pm and 3:45pm (CET) on 4 July**, concluding with a short Q&A session with Cosmo Tech executives from the Sales & Marketing teams.

Reserve Your Seat

I look forward to your attendance and with best wishes,

Dylan Kissane

VP Marketing
